

Vimalanathan Thanushan

Full-Stack Developer — MERN Stack — Backend Engineering — AI/ML

Email: thanushaan69@gmail.com — Phone: +94 776640272

Location: Batticaloa, Sri Lanka

GitHub: github.com/ThanushanVimalanathan

LinkedIn: www.linkedin.com/in/thanu-shaan-007d03m07

Profile

Full-stack developer with hands-on experience building scalable MERN applications, secure REST APIs, authentication systems, and real-time features. Proficient in backend engineering, database design, and cloud deployment. Strong foundation in debugging, performance optimization, and Agile development practices. Actively expanding expertise in AI/ML and integrating intelligent automation into web applications.

Technical Skills

- **Languages:** JavaScript (ES6+), Python, Java, TypeScript (basic)
- **Frontend:** React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, MVC Architecture, WebSockets
- **Databases:** MongoDB (Schema Design, Aggregations), MySQL, Firebase
- **Auth & Security:** JWT, OAuth, bcrypt, Role-Based Access Control, API Security
- **AI/ML:** TensorFlow, PyTorch, scikit-learn, NumPy, Pandas
- **Tools & DevOps:** Git, GitHub, Postman, Render, Vercel, VS Code, CI/CD (basic)
- **Core Skills:** System Design Basics, State Management, API Integration, Debugging, Testing

Education

BSc (Hons) in Information Technology

Horizon Campus, Malabe

Oct 2022 – Dec 2026

Relevant Coursework: Web Technologies, Software Engineering, Database Systems, OOP, Data Structures, Machine Learning, CI/CD Pipelines.

Projects

MERN — WebSockets — JWT Authentication — Scalable Architecture

Personal Project

Real-Time Messaging Application

2025

- Developed a real-time messaging platform using Socket.io supporting instant communication and online user status.
- Implemented secure authentication with JWT, hashed passwords, and protected API routes.
- Designed REST APIs for messaging, conversation history, and user management.
- Optimized MongoDB queries using indexing and efficient schema design.
- **Stack:** React, Node.js, Express.js, MongoDB, Socket.io.

MERN — E-Commerce Flow — API-Driven Architecture

Personal Project

Food Ordering Platform

2025

- Built an end-to-end ordering flow including menu browsing, cart logic, order placement, and user sessions.
- Engineered backend services with REST APIs for orders, payments (integration-ready), and admin menu control.
- Improved UI responsiveness and state management using React and custom hooks.
- **Stack:** React.js, Express.js, Node.js, MongoDB.

Real-Time — Kanban — WebSockets — Multi-User

Personal Project

Task Collaboration Board

2024

- Created a multi-user task board with real-time updates and drag-and-drop functionality.
- Implemented role-based access control (Admin/Member) and project-based permission layers.
- Developed project, task, and activity-log APIs following REST standards.
- **Stack:** MERN Stack, WebSockets.

API Integration — Frontend Engineering

Personal Project
2024

Weather Monitoring Dashboard

- Built a weather analytics dashboard integrating OpenWeather API with location-based forecasting.
- Created dynamic charts, temperature visualization, and real-time updates.
- **Stack:** JavaScript, HTML, CSS, REST API.

Full-Stack Academic Project — Secure Reporting

Academic Project
2024

Child Prevent Reporting System

- Designed and developed a secure, anonymous reporting system for child safety cases.
- Implemented form validation, case submission flows, and database persistence.
- **Stack:** HTML, CSS, JavaScript, RDBMS.

Interests

Backend Engineering, Full-Stack Development, AI/ML, Distributed Systems, API Architecture, Cloud Deployment.

Languages

- English — Fluent
- Tamil — Native
